*“Let them see the beautiful blendings  
and communions of death and life,  
their joyous inseparable unity,  
as taught in woods and meadows,  
plains and mountains and streams  
of our blessed star, and they will learn  
that death is sting-less indeed,  
and as beautiful as life,  
and that the grave has no victory,  
for it never fights.”*

*– John Muir, Thousand Mile Walk to the Gulf*

## General Disclaimer

The TransitionCoin is not an investment-grade security or a security of any kind. The Transition-Coin is a utility token for the sole purpose of enabling an additional mechanism for customers to purchase green burial services and does not confer ownership of a stake in any business.

It is generally to be used by the purchasers to secure green burial services, as described herein.

## **IMPORTANT**

**Transition Green Burials LLC strongly urges prospective purchasers of TransitionCoin to consult their investment advisers, lawyers, accounting and tax professionals before participating in this Initial Token Offering.**

## Executive Summary

A funeral may seem like our last exclusively personal decision, but the impact of that decision is actually far wider than it may seem. The choices we make around funerals and burials can impact our families, communities and the world for many generations.

The conventional burial process is a major source of pollution that contaminates local land, air and water. Not only are embalming fluids and caskets leaking toxins into the ground from the moment they are interred, but cremation also disperses caustic toxins into the air.

If the environmental concerns were not bad enough, the cost of conventional funerals and burials has been increasing rapidly and often can leave surviving family members with massive debts. If let unprepared, families face daunting decisions around a funeral process that can cost well over \$25,000.

With the development of the Green Burial movement, an environmentally sound alternative to the funeral or cremation process is now becoming available. By providing a time-honored burial that is both cost-effective and nurturing to the earth, green burials are an obvious solution to all of the issues posed by the modern funeral industry.

Many people have already chosen green burials for their funerals and the demand for this type of burial is rapidly rising. Although it is anticipated that the cost of green burials will stay well below the costs of conventional or “traditional” funerals, the costs of green burials will eventually rise. Currently, the cost of a green burial is around \$5,000.

TransitionCoin from Transition Green Burials LLC offers a way to reserve an environmentally sensitive Green Burial today or anytime in the future for \$4,000, a 20% savings immediately. TransitionCoins may be passed on to your loved ones as well.

Say a final farewell to funerals that poison the earth and bankrupt families. Imagine a funeral for yourself that is spectacular, affordable, and ecologically pristine. With TransitionCoin, this burial is not only possible, but something you can secure for yourself and your loved ones today.

---

## The “Traditional” Funeral: High Costs to You and The Environment

The “traditional” funeral home concept is a modern idea with a history of less than 150 years in the United States. Its cultural beginnings were in Victorian times, following the Civil War’s end in 1865, when there were so many deceased soldiers to bury that cabinetmakers were hired to build wooden coffins. By the 1880s an industry of outsourced funeral parlors had developed.

### Costs to You

The growth of the modern funeral home industry has led funerals to become difficult and costly. The average cost of a conventional funeral in the United States of America is over \$7,000. Loved ones often have to make difficult decisions while deeply grieving. In the presence of sales-focused funeral home directors, families often unknowingly choose options, such as luxury caskets or deluxe headstones, that can make the funeral and burial of their loved one cost well over \$25,000. These high costs can cause family members to lose inheritances, face financial hardship, and make the loss of a loved one feel burdensome.

While less costly overall, cremation is still often unaffordable. The average cost of a typical cremation, including the cremation, container, memorial ceremony and burying the cremated remains is over \$6,000. Decisions about caskets, cremation containers, and headstones still take place as part of the larger funeral home industry where sales, not care, can be the focus.

Finally, even these already high costs are likely to increase in the future. As demand for land becomes higher, burials costs will rise for all types of burials. Additionally, as the funeral industry continues to grow other costs will rise as well.

## Costs to the Environment

Cemeteries use over 900,000 gallons of neurotoxic pesticides every year, which are carcinogenic to humans and deadly to our ecosystems. Studies are now revealing that such pesticides as glyphosate sprayed over decades are showing up in the blood samples of our grandchildren and causing neurotoxic birth defects and birth anomalies.

Other environmental concerns include the embodied toxins used in the embalming process, which eventually end up downstream despite their short-term use for mere days before the actual cremation or burial. Licensed embalmers use over 800,000 gallons of formaldehyde a year, which is a carcinogenic chemical. Other chemicals used in embalming eventually run off into our drinking water supply, and cancer rates continue to skyrocket with a deadly impact.

Every year, 22,500 cemeteries across the United States bury approximately:

- *30 million board feet of preserved-wood caskets*
- *90,272 tons of steel caskets*  
*and 2,700 tons of copper and bronze caskets*
- *1,636,000 tons of reinforced concrete vaults*  
*and 14,000 tons of steel vault*
- *827,060 US gallons of embalming fluid,*  
*which usually includes formaldehyde*

Burials are not the only threat to the environment. Cremation also comes at a great cost to the natural world. Each cremation uses about 28 gallons of fuel and releases about 540 lbs. of carbon dioxide into the atmosphere. Thus, cremations in the United States produce about 270,000 tons of carbon dioxide per year. That's more CO<sub>2</sub> pollution than 22,000 average American homes generate in a year. This is a major and unnecessary carbon footprint that contributes enormously to climate destruction.

Furthermore, the burning of metal from jewelry, surgical implants, casket hinges, and more can leak toxins into the air despite efforts

of crematoriums to create filters. Toxic metals or plastics leach into the air and water, causing a public health concern. Calcified compounds within cremains can contain toxic metals such as lead, boron, cadmium, chromium, cobalt, copper, tin, lithium, magnesium, manganese, nickel, and strontium and these levels are not regulated.

In addition to the damage done to the environment during the cremation process, the ashes are then stored in metal urns or other non-biodegradable receptacles, and then often buried in cemeteries causing the same problems as burying caskets.

---

## **A Better Legacy: Green Burials**

### **Benefits of Green Burial**

The green burial process is a natural, beautiful, and cost-effective way to honor a loved one's passing. It echoes the most traditional burial processes that date back far beyond the modern funeral industry. In the last twenty years, the green burial movement has seen a resurgence with more and more people seeking a legacy and burial that honors themselves, their loved ones, and the planet.

According to the Funeral and Memorial Information Council, 64% of people 40 and older are interested in having an eco-friendly green burial. In 1998, the first dedicated green burial preserve was opened by a local doctor in South Carolina. By 2015, there were a total of 37 green cemeteries across the United States that met the stringent standards of the Green Burial Council. These green burial sites span the entire country from Lexington, Maine, to Mill Valley, California.

Green burials conserve natural resources, greatly reduce toxic emissions, and can help restore as well as preserve wild animal habitat and migration. These natural funerals do not use any carcinogenic or toxic chemicals, and make use of biodegradable materials in order to preserve the ground and ecosystem at the burial site.

Green burials are possible through companies like Transition Green Burials LLC, which was founded by Michael Murphy CFA and Dr. Diana Cunningham (NMD, ND-retired) to provide full-service green funerals and to establish large-acreage green burial sites

around the United States. Rather than having an eco-conscious funeral in a “green burial” corner of a conventional cemetery adjacent to toxins, pesticides, and carcinogens, these sites, named John Muir Green Burial Sanctuary, will offer dedicated space for green burials in spectacular locations.

Transition Green Burials LLC also will offer biodegradable caskets for those who want an alternative to a simple linen wrap, and will partner to provide transportation services as needed. Transition Green Burials LLC intends to offer additional services to families wishing to have reunions around the three-day vigil or day-long Celebration of Life in an on-site, green-built Sanctuary with over-night accommodations for an additional fee. Transition Green Burials LLC is committed to maintaining and stewarding the earth for green burials according to the high standards of the Green Burial Council.

Transition Green Burials LLC is seeking relationships to have other green burial cemeteries, service suppliers and biodegradable casket manufacturers and retailers accept TransitionCoin as a standard form of payment in the industry. To the extent that we are successful, an estate may be able to purchase a green burial at Green Burial Council recommended sites other than the John Muir Green Burial Sanctuaries using TransitionCoin as a method of payment.

## **Saving Money with Green Burials**

In contrast to the costs of \$7,000+ for a funeral home/cemetery burial, and \$6,000 for cremation burial, the average cost of a green burial is \$5,000, and the cost for a Transition Green Burial in the John Muir Green Burial Sanctuary is \$4,000 or 4,000 TransitionCoins. Owners of less than 4,000 TransitionCoins can always apply them at \$1 per coin to the then-current cost of a green burial, which may be higher than \$4,000. However, owners of 4,000 TransitionCoins will always be entitled to a green burial, regardless of the then-current cost.

*In summary, the average costs for burials are:*

<i>Conventional funeral and burial</i>	<i>\$7000 (and up)</i>
<i>Cremation and interment</i>	<i>\$6000</i>
<i>Green burial</i>	<i>\$5000</i>
<i>Green Burial with TransitionCoin</i>	<i>\$4000</i>

## **A Green Burial Token**

In early 2018, after noting the increased demand for green burials, Transition Green Burials LLC decided to create TransitionCoin in order to offer people another method to purchase green burial services. TransitionCoin is a utility token and smart contract on top of the Ethereum blockchain.

Transition Green Burials LLC will offer natural burials at any time in the future for 4,000 TransitionCoins. A green burial includes transportation of the body locally or from a nearby international airport, the burial area and its maintenance, the cost to open and close the grave, and a natural marker.

TransitionCoins may also be passed on after death as part of an inheritance. Since the dollar cost of funeral services and the demand for green burial services are expected to increase steadily, the value of a TransitionCoin may increase in the future.

---

## **Getting to Know the Green Burial Token Solution**

TransitionCoin will be used as an alternative method for payment and reserving green burial services for the John Muir Green Burial Sanctuaries. 4,000 TransitionCoins can be exchanged or redeemed for a green burial at any time in the future at one of our John Muir Green Burial Sanctuaries, allowing buyers to lock in an attractive price today for a green burial in the future. TransitionCoin is built on the Ethereum blockchain to provide a smart contract between Transition Green Burials LLC and the purchaser that can be resold to other interested parties. It will be listed through Ethereum and as on many other exchanges as Transition Green Burials LLC can arrange, and will be available for sale on our website.

As a helpful guide toward deciding whether to purchase Transition Green Burial Services today, we can calculate the projected cost of a

green burial given current age, gender, and average life expectancy, and projected rates of growth for green burial costs. These are only projections; we do not guarantee what price conditions will exist in the green burial services industry at any specific future date, although it is highly likely that industry prices as well as Transition Green Burial prices will increase over time.

The following table, provides an projected estimate of the cost of a green burial. The estate of a man now 50 years old who dies at his average life expectancy would have a projected green burial cash cost of \$15,905 at that time.

### Projected Cost of a Green Burial by Age

Age	Men	Women
35	\$27,002	\$31,589
40	\$22,638	\$25,964
45	\$18,742	\$21,767
50	\$15,905	\$18,242
55	\$13,329	\$14,294
60	\$11,394	\$12,817
65	\$9,934	\$10,956
70	\$8,658	\$9,365
75	\$7,697	\$8,005
80	\$6,843	\$7,259
85	\$6,327	\$6,580
90	\$5,849	\$6,033

The following examples show how customers or their estates will be able to purchase our green burial services after the TransitionCoin is made available.

Example 1: The deceased did not own any TransitionCoins but wanted a green burial. The estate could pay the then-current cost of a green burial at any Transition Green Burials site. The current cost of a green burial is \$5,000 and is expected to increase in the future. The first site is expected to be in the western United States.

Example 2: The deceased owned 4,000 TransitionCoins and wanted a green burial. The estate could transfer those coins to Transition Green Burials LLC for a green burial at any time in the future at any Transition Green Burials site, regardless of the then-current cash cost of a green burial.

Example 3: The deceased owned 4,500 TransitionCoins and wanted a green burial. The estate could sell 500 coins in the open market and transfer 4,000 TransitionCoins to Transition Green Burials LLC for a green burial at any Transition Green Burials site, regardless of the then-current cost of a green burial

Example 4: The deceased owned 1,500 TransitionCoins and wanted a green burial. The estate could apply the 1,500 TransitionCoins to the then-projected cash cost of a green burial at the rate of \$1.00 per coin, and pay the remaining amount due in cash.

For example, the table above shows the projected cost of a green burial for a woman currently 75 years old will be \$8,005 if she passes at her average life expectancy. The estate could transfer the 1,500 TransitionCoins to Transition Green Burials LLC and pay \$6,505 in cash for a green burial at any Transition Green Burials site.

Example 5: The deceased bought and owns TransitionCoins but later changed their mind about preferring a green burial. The estate could sell TransitionCoins in the open market and other burial services not provided by Transition Green Burials LLC could be purchased for cash.

## **The Team of Experts Supporting TransitionCoin**

Transition Green Burials LLC is operated by a two-person team who have worked together for over 18 years. Their complementary expertise makes them the perfect team to offer this unique green burial solution in the form of TransitionCoin.

**Michael Murphy CFA  
Chief Executive Officer**

Michael Murphy graduated from Harvard College with an AB *cum laude* in economics. He was formerly the Vice President for Investment Planning & Control at American Express Investment. He later founded and led his own investment management company where he consistently provided excellent advice for his clients.

**Dr. Diana Cunningham (NMD, ND-retired)  
President and COO**

Dr. Diana Cunningham graduated from Smith College as a Smith Scholar with a BA in a combined major of comparative religions, psychology and Women's Studies. She received her MA in Psychology

from the Western Institute for Social Research, her ND and NMD degrees from the University of Natural Medicine, and studied classical homeopathy in the UK as well. She practiced homeopathic medicine for over 25 years and currently focuses her efforts on grief work, natural end-of-life care, and green burial care.

## **Secure Technology: Blockchain, Ethereum, and Tokens**

The blockchain is a Distributed Ledger Technology (DLT) invented to support the Bitcoin cryptocurrency. It is a distributed database designed to maintain a continuously growing list of records called blocks. Each block contains a timestamp and a link to a previous block. A blockchain is managed by a peer-to-peer network collectively adhering to a protocol for validating new blocks and additions to the database.

Blockchains are secure by design and are an example of a distributed computing system with a high Byzantine fault tolerance. The database is not contained on one central node. Rather, it is contained in its entirety on every node on the network, which means it is more secure. Once recorded, the data in any given block cannot be altered retroactively. Functionally, a blockchain can serve as an open, distributed ledger that can record transactions between two parties efficiently and in a verifiable and permanent way.

Ethereum is an open-source, public blockchain-based DLT featuring scripting functionality. The Ethereum blockchain can be used for purposes beyond cryptocurrency and it can facilitate online contractual agreements called smart contracts. TransitionCoin is one such smart contract between the holder and Transition Green Burials LLC to provide green burial services.

## **Development**

The core focus of the TransitionCoin token issuance is the identification, purchase, and development of John Muir Green Burial Sanctuaries. The first Sanctuary is expected to be in the western United States. This may include, but is not limited to, the purchase of suitable land, submission of any government–required plans, development and maintenance of the property, public relations, and advertising expenses.

## **Ownership**

To ensure stability and long–term viability of the TransitionCoin, the entire Transition Green Burials LLC organization will be owned by its founders, employees, and possibly some small strategic investors. This will ensure that there is no outside investor influence on operations as Transition Green Burials LLC pursues its development roadmap to green burial services.

---

## Consumer Protection Disclosures

Transition Green Burials LLC maintains appropriate technical and organizational security procedures in order to keep your personal information confidential, and protect users' personal information against the loss, misuse, unauthorized access, disclosure or alteration, in accordance with applicable data protection and privacy laws. However, Transition Green Burials LLC cannot ensure or warrant the security of any information that users transmit to the Site.

---

*This document is intended only for the person(s) who were contacted directly by Transition Green Burials LLC. and it is not an offer to sell or a solicitation to buy any digital assets or security. It contains information that is confidential and privileged. If you have received this document in error, please notify the sender and delete this file.*

## **Audit Controls**

Audit controls will be in place to provide an independent, objective assurance and consulting activity designed to add value and improve the Transition Green Burials LLC operations. Audit controls aim to help Transition Green Burials LLC accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes.

- Compliance: With policies, rules, regulations, and laws.
- Authorization: Proper review and approval.
- Reliability and accuracy of data: Data is accurate, timely, useful, reliable and relevant.
- Effectiveness and efficiency: Operations are effective and efficient and add value; accomplishment and monitoring of goals.
- Safeguarding Assets: Assets are protected from theft, misuse, and/or destruction.

## **Financial Asset Management Controls**

Accounting methods employed by the Transition Green Burials LLC shall, at a minimum, satisfy such requirements as may be prescribed by federal or state laws, regulations or guidelines. Additional accounting methods shall be employed to satisfy applicable government accounting standards promulgated by such competent authoritative sources as the Governmental Accounting Standards Board (GASB) and Financial Accounting Standards Board (FASB), where applicable.

All financial transfers, funds or transactions will be deposited in a premier banking institution located in USA or other international banking institution that meets highest standards for banking services. All funds shall be deposited in a bank where Transition Green Burials LLC has an approved depository agreement.

## **Business Continuity**

Business Resiliency and Disaster Recovery are fundamental components of Transition Green Burials LLC business operations. Our Business Resiliency and Disaster Recovery programs allow Transition Green Burials LLC to provide continued service to our

customers and clients and to respond effectively to a disruptive event which may impact the company or interrupt normal operations.

The Enterprise Business Continuity Program is comprised of company-wide Business Resiliency and Disaster Recovery programs, which provides for the company's need to recover its business processes and the supporting technology in a timely manner during disruption. This is accomplished by following pre-defined management approved policies, strategies, and procedures. The program allows for the restoration of both technology and business process capabilities within predetermined timeframes.

Transition Green Burials LLC plans to build redundancy into the system with cloud-based servers located in geographically diverse locations to help ensure continuance of service to customers during outages.

## **Business Resiliency**

The objectives of Business Resiliency include the development of recovery strategies in order to minimize loss to Transition Green Burials LLC and its clients, continue to serve our customers, ensure the safety of employees, and minimize negative impacts of events. Each Transition Green Burials LLC business unit is responsible for completing a Business Impact Analysis (BIA) to determine the Recovery Time Objective of the business on an annual basis. The Recovery Time Objective allows Transition Green Burials LLC to prioritize key businesses for recovery during and after any type of incident.

## **Disaster Recovery**

Disaster Recovery focuses on restoring the company's critical systems and applications used by our internal businesses and external clients. Application recovery is prioritized based on the Recovery Time Objective identified in the Business Impact Analysis. Transition Green Burials LLC maintains Disaster Recovery Procedures for key systems and applications, which provides detailed plans to recover the system or application. These procedures span key personnel, components and applications that are necessary to minimize the impact to vital business processes following a data center outage.

## **AML and Fraud Protection**

We understand the importance of safeguarding the financial system in which we operate. We have implemented internal control policies and procedures to comply with the letter and spirit of the law and regulations of the USA PATRIOT Act, the Bank Secrecy Act (BSA), OFAC reporting and an Anti-Money Laundering (AML) compliance program designed to detect, prevent, counter and report suspicious transactions, money laundering and terrorist financing.

## **Electronic Communications**

When you visit a Transition Green Burials LLC website or send e-mails to us, you are communicating with us electronically. You consent to receive communications from us electronically. We will communicate with you by e-mail or by posting notices on a Transition Green Burials LLC Site. You agree that all agreements, notices, disclosures and other communications that we provide to you electronically satisfy any legal requirement that such communications be in writing.

Our privacy policy is available at <https://transitiongreenburials.com/privacy-policy>. Transition Green Burials LLC reserves the right to change this privacy policy at any time whereby relevant changes take effect for the future. The applicable version of this privacy policy is available on the Site. Please check this privacy policy regularly, and before you submit additional personal information via the Site.

## **Copyright**

All content included on the Transition Green Burials LLC websites, such as text, graphics, logos, button icons, images, audio clips, digital downloads, data compilations, and software, is the property of Transition Green Burials LLC or its content suppliers and protected by United States and international copyright. The compilation of all content on the Transition Green Burials LLC websites is the exclusive property of Transition Green Burials LLC and protected by U.S. and international copyright. All software used on the Transition Green Burials LLC websites is the property of Transition Green Burials LLC or its software suppliers and protected by United States and international copyright.

## **Leverage**

Transition Green Burials LLC doesn't use any financial leverage mechanisms which may value or devalue its token or other crypto-currency. Although Transition Green Burials LLC currently intends to pay cash for its green burial properties, we may use mortgage financing if that is required or appropriate for any property.

## **License and Site Access**

Transition Green Burials LLC grants you a limited license to access and make personal use of the Transition Green Burials LLC site and not to download (other than page caching) or modify it, or any portion of it, except with express written consent of Transition Green Burials LLC. This license does not include any resale or commercial use of the Transition Green Burials LLC site or its contents; any derivative use of the Transition Green Burials LLC site or its contents; any downloading or copying of account information; or any use of data mining, robots, or similar data gathering and extraction tools. Unless otherwise specified by Transition Green Burials LLC in a separate license, your right to use any software, data, documentation or other materials that you access or download through the Transition Green Burials LLC site is subject to these site terms or, if you have an Transition Green Burials LLC account, the agreement.

The Transition Green Burials LLC site or any portion of the Transition Green Burials LLC site may not be reproduced, duplicated, copied, sold, resold, visited, or otherwise exploited for any commercial purpose without express written consent of Transition Green Burials LLC. You may not frame or utilize framing techniques to enclose any trademark, logo, or other proprietary information (including images, text, page layout, or form) of Transition Green Burials LLC without express written consent. You may not use any meta tags or any other "hidden text" utilizing Transition Green Burials LLC's name or trademarks without the express written consent of Transition Green Burials LLC. Any unauthorized use terminates the permission or license granted by Transition Green Burials LLC. You are granted a limited, revocable, and nonexclusive right to create a hyperlink to any page of the Transition Green Burials LLC site, so long as the link does

not portray Transition Green Burials LLC, or its products or services in a false, misleading, derogatory, or otherwise offensive matter. You may not use any Transition Green Burials LLC logo or other proprietary graphic or trademark as part of the link without express written permission.

## **Applicable Law and Regulatory Jurisdiction**

By visiting the Transition Green Burials LLC Site, you agree that the law of the state of Delaware, without regard to principles of conflict of Transition Green Burials LLC, will govern these terms and any dispute of any sort that might arise between you and Transition Green Burials LLC. For questions, comments or inquiries, please contact us at:

**Transition Green Burials LLC**  
**1467 Siskiyou Blvd., Ste. 313**  
**Ashland, OR 97520 USA**

**Email: [TransitionGreenBurial@gmail.com](mailto:TransitionGreenBurial@gmail.com)**

**Telephone: 831-295-7695**

Any complaints concerning the privacy policy will be investigated, and if Transition Green Burials LLC is unable to resolve the complaint to the satisfaction of all parties, the parties agree to utilize the dispute resolution mechanisms provided for by JAMS (see <http://www.jamsadr.com/>).

## **Regulations and Licenses**

The funeral and burial service industry that we operate in is heavily regulated. We will need licenses that are necessary and required in order to operate our green burial facilities; such licenses, vary from state to state and from county to county. These may include licensing, permits, certification, contract regulation, penalties and sanctions, and dispute resolution.

## **Cautionary Statements Regarding Forward-Looking Statements**

Certain statements in this White Paper constitute forward-looking statements. When used in this document, the words “may,” “will,” “should,” “project,” “anticipate,” “believe,” “estimate,” “intend,” “expect,” “continue,” and similar expressions or the negatives thereof are generally intended to identify forward-looking statements. Such forward-looking statements, including the intended actions and performance objectives of the Company, involve known and unknown risks, uncertainties, and other important factors that could cause the actual results, performance, or achievements of the Company in its development of the Transition Green Burials LLC green burial sanctuaries to differ materially from any future results, performance, or achievements expressed or implied by such forward-looking statements. No representation or warranty is made as to future performance or such forward-looking statements. All forward-looking statements in this White Paper speak only as of the date hereof. The Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement contained herein to reflect any change in its expectation with regard thereto or any change in events, conditions, or circumstances on which any such statement is based. Prospective purchasers are not to construe this White Paper as investment, legal, tax, regulatory, financial, accounting or other advice, and this document is not intended to provide the sole basis for any evaluation of a purchase of tokens subject to this offering. Prior to acquiring tokens, a prospective purchaser should consult with its own legal, investment, tax, accounting, and other advisers to determine the potential benefits, burdens, and other consequences of such investment.

*“Flowers turning faces to the light for a single day or hour,  
having enjoyed their share of life’s feast --  
all alike pass on and away under the law of death and love.  
Yet all are our brothers and they enjoy life as we do,  
share Heaven’s blessings with us,  
die and are buried in hallowed ground,  
and come with us out of eternity to return to eternity...  
Our lives are rounded with a sleep.”*

*– John Muir, John of the Mountains: The Unpublished Journals*
